Defining Hybrid Modes of Learning

Hybrid Modes of Learning are those where:

- Some students attend class *remotely online*, and some students attend class in *face to face (f2f)* mode;
- At least some of the instruction takes place *synchronously* for both groups;
- The students that are remote, and those that are f2f may change over time in *predictable* or *unpredictable* fashion - for example:
 - *Predictable*: a rotation schedule, required by classroom COVID-19 occupancy limits, where half the students are remote one week, and f2f the next;
 - *Unpredictable*: in any given week, a student may not be able to attend f2f due to COVID-19 exposure, and have to attend class remotely.
